SKILLS

Apple Ecosystem

Swift, Objective-C, Xcode, SwiftUI, SwiftData, CoreData, XCTest, iCloud, App Store

General

Python, Golang, Ruby, TypeScript, Bash, REST, gRPC, Protobuf, PostgreSQL, Redis, BigQuery, Splunk

DevOps

CI/CD, Kubernetes, Docker, Ansible, Jenkins, Monitoring, Observability, Scaling, GCP, AWS, Git, Monolith repos, Microservices, Build systems, Caching

Testing

Unit testing, Integration testing, Mocking, UI Testing, Load Testing, Dependency Injection

EDUCATION

Coursera
Build a Modern Computer from First Principles (nand2tetris)
2017

edX Harvard
CS50x Computer Science
2015

Vanier College
Computer Science & Mathematics
Montreal Canada, 2010

VOLUNTEERING

San Francisco Public Library
Organizer + Game Master
Youth Tabletop Role-Playing Club
2022-2023

Canada Learning Code
Kids Learning Code Mentor
2017-2018

PROFILE

Passionate software engineer with a soft spot for delightful UX, efficient developer experience, and privacy-by-design. Over a decade of experience building systems to deliver optimized software that humans actually want to use. Honing my craft and exploring the intersection of technology and the humanities.

EXPERIENCE

Software Engineer, iCloud Platform Client | **Apple**
Sep 2024 - Present | Cupertino CA

- Development on CloudKit framework and daemon across all major OS platforms
- Rebuilt CI/CD pipelines for all iCloud Platform OS components leveraging build caching, test parallelization, VM integration, and SDK validations
- Significant at-desk developer environment improvements leveraging various internal APIs, metrics, and modern LLM tooling
- Triage and diagnose internal bug reports for prerelease OS updates

Software Engineer, Developer Productivity + Release | **Snap Inc**
Feb 2021 - Feb 2024 | San Francisco & Palo Alto CA

- Modernized build system from Bash+Python2 to custom **Python3** framework with metrics, error reporting, and modularity.
- Designed custom build variants for different audiences and feature sets; reduced build times with graph optimizations and dependency caching; coordinated SDK upgrades and OS deprecations.
- Built release orchestration platform (golang/gRPC) for iOS and Android products: post-merge builds, QA/beta/production tracks, metrics-backed phased rollouts, and reporting
- Owned client codesigning: certificates, keys, profiles, and entitlements across developer accounts; refactored tooling to reduce rotation risk. Partnered with Security on code obfuscation and client attestation.
- Participated in **Mobile Release Manager** on-call rotation, performing store submissions and hot fixes, liaised with Apple / Google re: policy changes and store rejections, and aggregated feature rollout plans for cross-team launch initiatives

Software Engineer, Bitmoji | **Snap Inc**
May 2019 - Feb 2021 | Toronto, Canada

- Migrated Bitmoji apps from legacy Bitstrips infra to various Snap platforms, enabling codesharing and consolidated tooling
- Integrated Firebase, AppCenter, and BugSnag SDKs; bug fixes and UI improvements to Bitmoji Sticker Picker (iOS, Android, Chrome extension)

Software Developer, Automation | **Connected Lab** (now Thoughtworks Canada)
Oct 2017 - Apr 2019 | Toronto, Canada

- Built iOS/Android automation framework for end-to-end testing on physical devices
- Developed video preprocessing pipelines for ML dataset annotation, IoT firmware manager, and voice skill testing toolkit

Software Developer Intern | **Shopify**
Sep 2016 - Dec 2016 | Ottawa, Canada

- Full-stack development on Shipping team, implementing new features and bug fixes on Admin Settings panel
- Extended backend microservice for integration with shipping partners
- Refactored integration test suite, improving reliability and performance

Software Quality Analyst | **VarageSale**
Jun 2014 - Aug 2016 | Toronto, Canada

- QA on Infrastructure Team, focused on Payments and Notifications.
- Automated staging server deployments

QA Compliance Specialist (TRC) | **VMC Game Labs** (now Keywords Studios)
Sep 2011 - Jul 2013 | Montreal, Canada

- Technical Requirements Compliance testing for PlayStation certification.
- Authored and maintained functional and TRC test suites for cross-functional teams
